

# DEGREA

CATALOGO 2019

La Terracotta per DEGRE è soprattutto una grande passione.

Con la passione si può dare forma ad idee e pensieri, ottenendo oggetti di uso comune che abitano la casa, la riscaldano e si armonizzano con essa. Degrea si riconosce nell'abilità di produrre industrialmente pezzi quasi unici, realizzati con la sensibilità di chi da generazioni si tramanda questa passione.

L'argilla è un materiale naturale e vivo, da sempre ha costituito la base per la creazione di molti oggetti di uso quotidiano come i vasi, semplici all'apparenza ma che solo con la cura e l'attenzione in ogni fase del ciclo produttivo raggiungono gli standard qualitativi che Degrea si è imposta e che la caratterizzano nel panorama industriale internazionale.

Degrea utilizza solo argille vergini, selezionate nel raggio di centinaia di chilometri, dosate e macinate a secco in un impianto completamente automatico che garantisce ai prodotti una superficie liscia e la giusta porosità. La formatura, l'essiccazione e la cottura, effettuate con i sistemi tecnologici più avanzati nel settore, conferiscono ai prodotti una ottima resistenza meccanica e una resistenza al gelo che unitamente al design sono le qualità più apprezzate dei prodotti Degrea.

In questi anni Degrea è riuscita a soddisfare le richieste del mercato tradizionale, ma ha portato anche innovazione con nuove linee di prodotti, oggi imitati, ma dalla qualità ancora ineguagliata. L'accuratezza dell'imballo, l'efficiente e puntuale servizio reso al cliente sono tra i maggiori punti di forza di Degrea che è presente con i propri prodotti in più di 30 Paesi in 5 continenti.

L'attenzione e la cura per un prodotto così naturale non poteva prescindere dal massimo rispetto verso l'ambiente con particolare attenzione alle fonti energetiche utilizzate. E' con questa sensibilità che Degrea ha realizzato un impianto per la produzione elettrica da pannelli fotovoltaici che copre per oltre il 50% il proprio fabbisogno e che consente il risparmio di oltre 450 tonnellate annue di immissione di Co2 in atmosfera.

For DEGRE, terracotta is mostly a great passion.

With passion you can shape ideas and thoughts, creating commonly used objects which are found in a house, warm it up and are in harmony with it. Degrea is characterized by its talent at industrially manufacturing almost unique items, on the basis of the sensitivity of people who have been passing on this passion from generation to generation.

Clay is a natural and living material, which has always been the basis for creating many commonly used objects such as vases. They are apparently simple, but only thanks to great care and attention in each phase of their production cycle they can reach the qualitative standards which Degrea has set for itself, and which characterize it in the international industrial scene.

Degrea only uses virgin clays, selected within a radius of hundreds of kilometres, dosed and ground in a dry way in a fully automatic system which guarantees a smooth surface and the right porosity for all products. The moulding, drying and firing, performed by means of the most advanced technological systems, pass on the products an excellent mechanical resistance and make them frost resistant, which along with the design are the most appreciated qualities of Degrea products.

In the last few years Degrea has managed to satisfy the demands of the traditional market, but has also introduced some innovation with new lines of products, which are being imitated by now, although their quality has no equal yet. The accuracy of the packaging, the efficient and timely services to our customers are some of the fortes of Degrea, whose products are present in over 30 Countries in 5 continents.

Attention and care for such a natural product cannot ignore the utmost respect for the environment, particularly the energy sources used. On the basis of this sensitivity, Degrea has designed a photovoltaic panel electric power production system which covers over 50% of its requirements, thus making it possible to save over 450 tons of CO2 emissions into the atmosphere every year.

Terracotta ist für DEGRE eine wahre Leidenschaft.

Und die kann Ideen und Gedanken Gestalt geben und in alltägliche Gegenstände verwandeln, die Ihr Heim mit Leben füllen und sich voller Wärme mit ihm harmonisieren. Degrea wird die Fähigkeit zugesprochen praktisch Einzelstücke industriell zu fertigen, und das mit dem Feingefühl jener, die sich seit Generationen dieser Passion widmen.

Ton ist ein lebendiges Naturprodukt aus dem seit undenklichen Zeiten zahllose Alltagsgegenstände geschaffen werden. Wie die dem Anschein nach einfachen Tontöpfe, die nur dank der Sorgfalt und Aufmerksamkeit, die jeder Herstellungsphase gewidmet wird, den Qualitätsstandard erreichen, den sich Degrea zum Ziel gesetzt hat und der unseren Betrieb im internationalen Panorama auszeichnet.

Degrea verwendet ausschließlich unbehandelte Tonerden, die im Umkreis von hunderten von Kilometern ausgewählt, dosiert und in einer vollkommen automatisierten Anlage trocken gemahlen werden, um die glatte Oberfläche und korrekte Porosität der Produkte zu gewährleisten. Die Formgebung, das Trocknen und das Brennen erfolgt unter Anwendung fortschrittlichster Technologien. Sie verleihen den Produkten eine optimale mechanische Resistenz und Frostfestigkeit, die zusammen mit dem Design zu den am höchsten geschätzten Eigenschaften der Keramiken von Degrea gehören.

In den vergangenen Jahren ist Degrea den Anforderungen des traditionellen Marktsegments nachgekommen und hat zugleich mit neuen Produktlinien Innovationen eingeführt, die heute imitiert werden, deren Qualität aber noch nicht erreicht wurde. Die sorgfältige Verpackung und der effiziente und pünktliche Kundendienst gehören zu den Pluspunkten der Firma Degrea, die mit ihren Produkten in über 30 Ländern in 5 Kontinenten präsent ist.

Die Sorgfalt und Aufmerksamkeit die wir diesem Naturprodukt widmen, führte selbstverständlich dazu, dass wir uns stark für den Umweltschutz einsetzen und unser Augenmerk vor allem auf die verwendeten Energiequellen richten. Aus diesem Grund hat die Firma Degrea eine Photovoltaikanlage verwirklicht, die über 50% unseres Energiebedarfs deckt und die jährlichen CO2-Emissionen um 450 Tonnen verringert.

Pour Degrea, la poterie est avant tout une grande passion.

Avec la passion, on peut donner forme à des idées et à des pensées, pour obtenir des objets du quotidien qui habitent la maison, qui la réchauffent, et qui s'harmonisent avec leur environnement. On reconnaît Degrea à sa capacité de produire industriellement des pièces quasiment uniques, réalisées avec la sensibilité que confère le talent transmis au fil des générations.

L'argile est un matériau naturel et vivant, qui depuis toujours constitue un élément de base pour la création de nombreux objets d'usage quotidien, comme les vases, simples en apparence, mais qui exigent beaucoup de soin et d'attention à toutes les phases du cycle de production pour atteindre le niveau qualitatif que requiert Degrea et qui caractérise cette entreprise dans le panorama industriel international.

Degrea n'utilise que des argiles vierges, sélectionnées dans un rayon de centaines de kilomètres, dosées et broyées à sec dans une installation entièrement automatique, qui confèrent à ses produits une surface lisse et une porosité appropriée. La mise en forme, le séchage et la cuisson, effectués à l'aide des systèmes technologiques les plus avancés du secteur, garantissent l'excellente résistance mécanique des produits et leur résistance au gel, des caractéristiques qui, associées au design, constituent les qualités les plus appréciées des produits Degrea.

Au cours de ces dernières années Degrea est parvenue à satisfaire les exigences du marché traditionnel, mais avec ses nouvelles lignes de produits, aujourd'hui tant imitées mais dont la qualité est loin d'être égalée, elle a aussi été une source d'innovation. La précision de l'emballage et l'efficacité et la ponctualité du service rendu à la clientèle sont des points de force majeurs de Degrea, qui commercialise ses produits dans plus de 30 Pays sur 5 continents.

L'attention et le soin mis en œuvre pour fabriquer un produit aussi naturel ne peuvent s'affranchir du plus grand respect pour l'environnement et d'efforts particuliers pour l'utilisation d'énergie renouvelable. C'est avec cette sensibilité que Degrea a réalisé une installation de production d'électricité à partir de panneaux photovoltaïques couvrant plus de 50% de ses propres besoins et permettant d'éviter l'émission de plus de 450 tonnes de CO2 dans l'atmosphère.

Para DEGREA, la terracota es esencialmente una gran pasión.

Las ideas y los pensamientos cobran fuerza gracias a la pasión y culminan en objetos de uso común que decoran la casa, le otorgan calidez y se armonizan con ella. Degrea reconoce su habilidad en la fabricación de piezas casi únicas con método industrial, realizadas con la sensibilidad de quien transmite esta pasión desde generaciones.

La arcilla es un material natural y vivo, y desde siempre representa la base para crear numerosos objetos de uso cotidiano como las macetas, aparentemente sencillos, pero que solo con el cuidado y la atención que se les dedican en cada fase del ciclo productivo logran obtener los estándares cualitativos que Degrea se ha impuesto y que caracterizan sus productos en el panorama industrial a nivel internacional.

Degrea utiliza únicamente arcillas vírgenes, seleccionadas en un radio de cientos de kilómetros, dosificadas y molidas en seco en una instalación completamente automática, que garantizan una superficie de los productos lisa y con la justa porosidad. El moldeo, el secado y la cocción se efectúan con los sistemas tecnológicos más avanzados en el sector y confieren a los productos una óptima resistencia mecánica y una resistencia al hielo que, junto con las características del diseño, representan las cualidades más apreciadas de los productos Degrea.

En el curso de estos años, Degrea ha logrado satisfacer los pedidos del mercado internacional pero ha introducido también innovación con las nuevas líneas de productos, que actualmente son objeto de imitación aunque su calidad sigue siendo inigualada. Algunos de los principales puntos fuertes de Degrea se reconocen en la meticulosidad del embalaje y en el servicio eficiente y puntual puesto a disposición del cliente; los productos Degrea están presentes en más de treinta países de los cinco continentes.

La atención y el esmero dedicados a un producto tan natural no podían prescindir del máximo respeto por el medio ambiente, con particular atención a las fuentes energéticas utilizadas. Esta sensibilidad ha llevado a Degrea a construir una instalación para la producción de energía eléctrica con paneles fotovoltaicos que cubre más del 50% de la energía necesaria para su actividad, y que permite ahorrar la emisión de más de 450 toneladas anuales de CO2 en la atmósfera.

Терракота для компании DEGREA - это, прежде всего, большая страсть.

Она помогает придавать форму идеям и мыслям и создавать предметы, живущие в доме, греющие его и вступающие с ним в гармоничную связь. Компании Degrea удается создавать промышленным способом практически уникальную продукцию, отражающую тонкий вкус тех, кто уже в течение нескольких поколений вкладывает свои силы и страсть в это производство.

Глина - это натуральный и живой материал, испокон веков используемый для создания многих предметов повседневного пользования, таких как цветочные горшки. Но, несмотря на кажущуюся простоту, горшки изготавливаются в соответствии с международными стандартами качества, благодаря неустанным контролю на всех стадиях производства.

На производстве Degrea используется только натуральная глина, добываемая в специальных местах, расположенных в радиусе нескольких сотен километров. Глина дозируется и измельчается в сухом виде на полностью автоматизированном оборудовании, что позволяет получить гладкую поверхность и требуемую пористость. Формовка, сушка и обжиг, выполняемые на самом современном оборудовании, придают изделиям высокую механическую прочность и морозоустойчивость, которые вместе с уникальным дизайном являются отличительными качествами продукции Degrea.

За последние годы вместе с традиционной продукцией фирма начала выпускать линии новых изделий. Они до сих пор сохраняют свою неповторимость, несмотря на то, что были сразу скопированы другими производителями. Надежная и аккуратно сделанная упаковка, обязательность и эффективность услуг клиенту - основные стратегические позиции компании Degrea, продукция которой представлена в более 30 странах мира на 5 континентах.

При производстве изделий из натурального сырья первостепенное внимание уделяется вопросам защиты окружающей среды и чистым источникам энергии. С этой целью компания стала использовать для производства электроэнергии солнечные панели - с их помощью покрывается более 50% собственных нужд (при традиционном способе производства такого количества электроэнергии в атмосферу выбрасывается в год 450 тонн углекислого газа).
